

Art Therapy Easels

Tom Bartindale, Dec 2010

Hand crafted of solid oak and walnut these multi-touch artists easels are fully adjustable and include a high resolution, super sensitive multi-touch screen based on FTIR.

Built for various projects involving gaze detection and un-supervised therapy 3 of these systems are currently on trial with art-therapy clients in Toronto, Canada.

Technologies

- Custom build FTIR surface in a hand-crafted adjustable easel

Arising Publications

 [Design and prototype of a device to engage cognitively disabled older adults in visual artwork](#)
